-----------------------------------------------

## SKILLS

MAIN ....HTML, CSS, JS , REACT , MY SQL , NODE, EXPRESS JS , TAILWIND

Basics: MATLAB , C++ , PYTHON ,

HARDWARE : circuit Designing , Arduino , Raspberry Pie etc

-----------------------------------------------

## EDUCATION

**Bachleors in Computer Systems Engineering**
**UIT University**
2020-2024

---------------------------------------------

**Internships**

**CODESOFT**

**MORETON BAY**

---------------------------------------------

## CERTIFICATIONS

**NAND TO TETRIS FROM COURSERA.**

**PYTHON FROM COURSERA.**

**FRONTEND DEVELOPMENT**

## PROJECTS:

**AMAZON CLONE**
"Designed and implemented a responsive Amazon clone using HTML, CSS, and JavaScript, showcasing my proficiency in front-end development. The project includes key features such as product listings, user authentication, and a dynamic shopping cart.

**E-Commerce Restaurant :**
"E-commerce Restaurant project using HTML, CSS, and JavaScript, featuring a visually appealing interface with menu listings, ordering functionality, and responsive design for an immersive online dining experience."

**Nike Website:**
"Nike-inspired website project crafted with HTML, CSS, and JavaScript, showcasing a dynamic and interactive platform with product displays, filtering options, and seamless navigation for an engaging and responsive shopping experience."

**HARDWARE PROJECTS :**
Exhaust Fan .
Gates Designed.
Autocad London Bridge etc
Also Many More Projects on My Github Profile. that Showcase 100 plus Js Projects .

-----------------------------------------------------------------------------------------------

### Experience:
2022-2024

"Accumulated two years of proficient frontend development expertise in HTML, CSS, and JavaScript, demonstrating a strong command of responsive design, UI/UX principles, and dynamic web applications for an impactful digital user experience."

-----------------------------------------------------------------------------------------------

### Final Year Project in University

2023-2024

"Developed an OBE (Outcome-Based Education) System Automation using the MERN (MongoDB, Express.js, React.js, Node.js) stack, streamlining the assessment process for teachers. This system automates the calculation of Student Course Learning Outcomes (CLOs) and Program Learning Outcomes (PLOs), eliminating manual efforts by seamlessly managing data, assessments, and analysis in a centralized platform, replacing the need for Excel sheets."

### User-Friendly Interface:
- Development of an intuitive user interface for both teachers and administrators, ensuring a seamless experience in inputting, managing, and extracting data.
